Sharen

Front-End Developer

Developed a real-time monitoring and reporting web application for a VOIP system. The app includes dashboard pages for monitoring queues, extensions, agents, and call activity—all updated in real time via WebSockets And SSE And a Web based Phone(Jssip). It also features report pages with extensive tables and charts for statistical analysis. I designed the UI and built the software from scratch.

. React 19, Typescript, TanStack Virtual, TanStack Query, Zustand, WebSocket, SSE, JSSIP, webRTC, Shadcn UI, Multilanguage support.
